E-STEAM ON THE CLOUD PROJECT

It concerns with gender equality in secondary and upper-secondary education and aims at contributing to increased capabilities to reduce stereotypes by developing a series of innovative and interactive materials, tested through a behavioural science lens for their potential to increase equality by amendment of practical everyday skills and social norms regarding attitudes and stereotypes in teaching STEAM.

E-STEAM ON THE CLOUD E-SOC

Erasmus+ project – KA220-SCH – Cooperation partnerships in school education.

This project is concerned with gender equality in secondary and upper-secondary education and aims at contributing to increased capabilities to reduce stereotypes by developing a series of innovative and interactive materials, tested through a behavioural science lens for their potential to increase equality by amendment of practical everyday skills and social norms regarding attitudes and stereotypes in teaching STEAM.

MISSION ACCOMPLISHED!

Our project is coming to an end. We are satisfied with the outputs we have put at the service of gender equality in STEAM education. To achieve these outputs, we have piloted them in all member countries, involving teachers, students, and experts. Everyone has given their feedback, and our project has considered their suggestions so that the outputs respond to the target audience's interests.

To close our project, we will organise multiplier events in each of the countries of the consortium. These events aim to disseminate ESOC's results and show the process we have gone through to reach the main goal we set for our project.

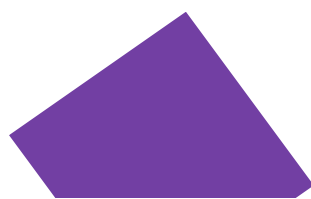

E-STEAM ON THE CLOUD - OUTPUTS

One of the E-Steam on the cloud project outputs is a website hosting the training program, the recommender system, and the teacher's help platform.

This website is easy to navigate and contains downloadable documents and links, allowing the user to access ESOC's materials and resources prepared for its stakeholders.

The STEAM teacher training program for secondary and high school teachers contains practical materials to apply to their students. Teachers will be able to adapt the proposed lesson plans according to the characteristics of their classes. The training program manual consists of two parts: a theoretical and a practical part.

E-STEAM ON THE CLOUD - OUTPUTS

The Recommender System is available in all consortium languages and is designed for STEAM teachers to diagnose their gender stereotypes when teaching STEAM. Once finished, this questionnaire will redirect teachers to the Teacher Help Platform, where they will find materials to support them in promoting gender equality in STEAM teaching.

Brussels, 5th & 6th October 2023.

Final Multiplier Event

This event will take place at European School of Brussels IV, our partner in Belgium.

In this final Multiplier Event, the E-STEAM on the Cloud Erasmus+ Project N° 2021-1-ES01-KA220-SCH-000032742 consortium will present the results of 2 years of cooperative work funded by European programs in the field of cooperation in school education. We will share good educational practices, activities and tools for professional development in deconstructing the gender equality in STEAM education.

Influential representatives of the European Commission, the Office of the Secretary-General of the European Schools, and European Schools will be attending to give some insights on inclusive education.
